Subject: TE study

Dear Roger,
I reviewed the budget, the contract and the open questions for the pilot study. The contract looks okay to me as well as the budget concerning the overall figure. Without a protocol it is anyway not yet final.
Questions: subjects that will not be able to follow the protocol should be excluded. I would also propose to exclude subjects with Asthma, Diabetes and Hypertension in this pilot study. Subjects with Chronic Bronchitis should not be excluded.
Best regards
Hans
